

Password Module

Overview

TMS Password Module allows all the users to update their TMS Password as and when they require. To do this, the user must select “**Change Password**” option under **PASSWORD** menu.

Following screen can be made use to update the password.

Change Password

Home > Settings > Change Password

Old Password *

New Password *

Confirm New Password *

Password Policy:

Choose a password which meets below recommendation.

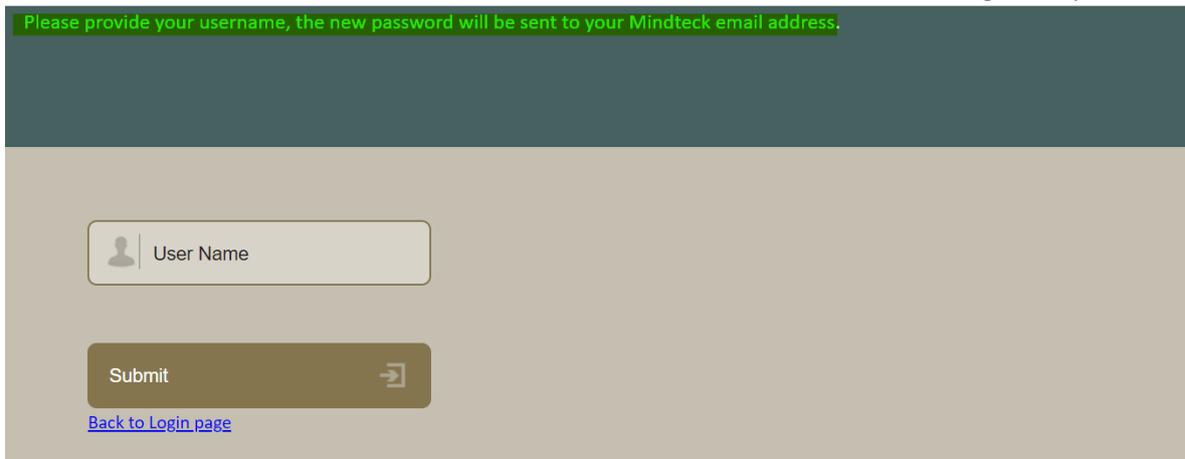

- 1.Length is at least 8 characters.
- 2.Should contain all of the following four character groups:
 - a.English uppercase characters (A through Z);
 - b.English lowercase characters (a through z);
 - c.Numerals (0 through 9);
 - d.One special character (such as !,\$,#,%)
- 3.New Password should be different than the previous 5 passwords.

In case of **Forgotten Password**, the user must select “**Forgot Password?**” option on Login Page. And Provide the Username to get a new password.

Timesheet Management System

Remember Me [Forgot Password?](#)

Resultant page asks the user to enter the **Username (Not Email Id)** and proceed.

The screenshot shows a web form with a dark teal header containing the instruction: "Please provide your username, the new password will be sent to your Mindteck email address." Below the header is a light beige background. The form includes a text input field with a person icon and the placeholder text "User Name". Below the input field is a dark brown "Submit" button with a right-pointing arrow icon. At the bottom left of the form is a blue hyperlink labeled "Back to Login page".

Once it is done, the corresponding user will get an email with the reset Email Id.
